

Map Inferred Topics to True Topics

[0.33333334 0.33333334 0.33333334]

[(0, '0.352*"pike" + 0.232*"bass" + 0.155*"deep" + 0.136*"catapult" + 0.100*"horn" + 0.025*"tuba"''), (1, '0.392*"bass" + 0.191*"tuba" + 0.170*"deep" + 0.148*"horn" + 0.078*"pike" + 0.021*"catapult"''), (2, '0.242*"horn" + 0.180*"deep" + 0.166*"bass" + 0.165*"pike" + 0.156*"tuba" + 0.092*"catapult"'')]

Mapping Inferred Topic 0

Inferred Topic 0:

- High probabilities for "pike" (0.352), "bass" (0.232), "deep" (0.155)

True Topic 0:

- High probabilities for "bass" (0.4), "pike" (0.4), "deep" (0.2)

Conclusion: Inferred Topic 0 closely matches True Topic 0.

Mapping Inferred Topic 1

Inferred Topic 1:

- High probabilities for "bass" (0.392), "tuba" (0.191), "deep" (0.170), "horn" (0.148)

True Topic 2:

- High probabilities for "bass" (0.3), "tuba" (0.3), "deep" (0.2), "horn" (0.2)

Conclusion: Inferred Topic 1 closely matches True Topic 2.

Mapping Inferred Topic 2

Inferred Topic 2:

- High probabilities for "horn" (0.242), "deep" (0.180), "bass" (0.166), "pike" (0.165), "tuba" (0.156)

True Topic 1:

- High probabilities for "pike" (0.3), "horn" (0.3), "catapult" (0.3)

Observation: Inferred Topic 2 has higher probabilities for "horn" and "pike," which are significant in True Topic 1. However, "catapult" has a lower probability in the inferred topic compared to the true topic.

Conclusion: Inferred Topic 2 corresponds to True Topic 1, albeit with some discrepancies.

Summary of Mapping

Inferred Topic 0 corresponds to **True Topic 0**.

Inferred Topic 1 corresponds to **True Topic 2**.

Inferred Topic 2 corresponds to **True Topic 1**.
